Profile

Dynamic Full Stack Web Developer with 8 years of experience in crafting innovative web solutions and leading technical teams. Expertise encompasses PHP, Python, and Node.js, complemented by a strong foundation in user experience design and automated data extraction. Proven ability to oversee project lifecycles, ensuring high-quality deliverables while fostering collaboration and knowledge sharing within teams. Committed to utilizing advanced system architecture and data quality principles to enhance functionality and performance in web applications. Open to remote and relocation opportunities to further drive impactful solutions in diverse environments.

WORK EXPERIENCE

Senior Web Developer, Zeropoint.HR, Islamabad

02/2020 – Present
Islāmābād, Pakistan

Served as a Senior Web Developer specializing in data quality and monitoring solutions.

Executed various projects related to data quality and monitoring, concentrating on data collection and validation mechanisms.

Created tailored web scraping tools utilizing Python (Scrapy) and managed backend operations with Symfony (PHP).

Engineered comprehensive system architecture encompassing design, development, and deployment phases.

Developed automated data extraction pipelines alongside integrity verification processes and reporting dashboards to maintain data accuracy and reliability.

Senior Web Developer, vizzwebsolutions

02/2018 – 02/2020
Islamabad

Progressed from PHP Developer to Senior Full Stack Developer and Team Lead, overseeing multiple projects and guiding a team.

Transitioned from a PHP Developer role to a Senior Full Stack Developer and Team Lead position over two years.

Managed a team of developers, providing technical guidance and support throughout project lifecycles.

Oversaw the development and implementation of web solutions, ensuring high standards of quality and performance.

Coordinated project timelines and deliverables, aligning team efforts with client expectations.

Facilitated knowledge sharing and best practices within the team to enhance overall productivity.

Web Developer, ZAMH TECH

09/2016 – 01/2017
Rawalpindi

Worked as a Web Developer, focusing on building effective web solutions and supporting development processes.

Collaborated with team members to troubleshoot and resolve technical issues during the development phase.

Assisted in meeting project deadlines and ensured the delivery of high-quality products.
